Option 1 : StudySmart AI – Your Personal AI Tutor

Option 2 : FitTrack AI – Your Personal Fitness Assistant

Option 3 : SafeRoute AI – Your Smart Travel Companion

- My Final App Idea- Tutoring app
- App Name- Personal AT
- Problem My App Solves: High school students and University students can't always meet the office hours that teachers have, whether they live far or have extra extracurriculars. Have the opportunity to receive help whenever, wherever.
- Who Will Use My App- Students from grade levels 9th and above, which they can be university students, or even community college students.
- Why I Chose This Idea – I chose this idea because I would love to have a personal ai tutor to my disposal whenever I need it. Also, it is something that alot of people can benefit from, especially those who are taking those AP classes
